

The mechanical handling of material being a treatise on the handling of material such as coal, ore, timber, c. by automatic or semi-automatic . of such plant, also dealing fully wit

By George Frederick Zimmer

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 162 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: . . . as not to project over the sides of the pontoon. The position of the shear legs when the elevator is housed is approximately at an angle of 35 degrees to the deck. To bring the elevator into action the main jib is hauled in, while at the same time the end of the jib moving in the slot in the side of the elevator trunk travels to the lowest point of the slot, with the result that the elevator is raised to a considerable height and rests in a vertical position in front of the shear legs. The pontoon is then brought with its bow against the side of the grain vessel. This is facilitated by the square nose of the pontoon. The elevator being sufficiently high above the bulwarks, will be over the hold when the pontoon touches the ships side. It is then lowered...
