Product Description In our society, it's illegal to sell a kidney or a lung, but you can buy human reproductive material such as eggs and sperm. Reproductive technologies-- in vitro fertilization, cloning, and embryo transplants-- are making headlines. The treatment of infertility is a multi-billion dollar business in the United States, affecting an estimated 15% of couples trying to have a baby. Many professional organizations, journals, as well as consumer organizations, support groups and magazines deal with the topic, yet most people don't understand what couples who have infertility experience. And even less is known about the option of having someone else have your baby. You can hire a surrogate, who donates her own egg that is fertilized by artificial insemination, or a gestational carrier, who does not contribute any genetic material but carries a transplanted embryo for a pregnancy. Surrogacy is mentioned twice in the Bible, but notoriety about cases involving disputes over the baby has left many people with the notion that surrogacy is a rare event, only recently used. Few states specifically allow surrogacy, and some outlaw it. Most states are...
