

# The Assay and Analysis of Iron and Steel, Iron Ores and Fuel

Filesize: 6.8 MB

## ***Reviews***

*The very best pdf i possibly study. It generally will not expense excessive. You wont really feel monotony at anytime of the time (that's what catalogs are for concerning should you ask me).  
(Prof. Owen Sporer)*

## THE ASSAY AND ANALYSIS OF IRON AND STEEL, IRON ORES AND FUEL

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 Excerpt: .One gramme of the steel or iron is dissolved in 12 cubic centimetres of nitric acid (sp. gr. 1-2) at a temperature of 90 to 100C. When solution has been effected 30 cubic centimetres of hot water are added, followed by 13 cubic centimetres of caustic soda solution (sp. gr. 1-27.) The colouring matter is dissolved by the soda, the intensity of the tint being times that possessed by an acid solution. The liquid is diluted to 60 cubic centimetres and allowed to stand 10 minutes. It is then filtered through a dry filter and compared with a standard which has been treated in a similar manner. Mr. Stead uses a special form of chromometer for the comparisons. Eggertz recommends the use of 1-5 cubic centimetres of nitric acid when the percentage of carbon is small, and insists upon the necessity of diluting the solution with at least an equal measure of water before comparing, so as to destroy the greenish tint. CHAPTER VII. THE DETERMINATION OF CHROMIUM. One gramme of the iron or steel containing chromium is dissolved in the usual mixture of acids, the silica separated by evaporation, and the iron and chromium precipitated by ammonia, in a porcelain dish, the reagent being added in the least possible excess and the mixture digested until the supernatant liquid is colourless. The precipitate is well washed and afterwards dried in the water oven. It is then removed from the filter paper and mixed in a platinum...
